

Hello,

In addition to my resume outline I have also worked with two additional employers post 2009. One role for Delaware North Corporation at Fingerlakes Gaming and Racetrack as a Surveillance Investigator. That required video observation to floor investigations as a licensed NY State Lottery agent. Report documentation with forensic chain of custody detail for Law Enforcement as required.

Following that I was employed at Pioneer Millworks, in Farmington, NY. That role included multiple duties, however the primary reason of hire was my expertise in operating and upgrading a Wintersteiger DSG Notum Frame saw. The core purpose was to mill white oak into 5 MM wear layers that were milled specifically for replacing all of the wood flooring throughout Harvard.

What do I bring? A unique quality of work ethic, integrity, non-smoker, do not use drugs, and do not drink. With proper orientation I can usually fulfill multiple overlapping roles as business needs require. This can fill a business void and provides co-workers a great option to pursue new opportunities within an employ as they become available.

In summary this outline along with my resume presents only a small snapshot of ability. I believe in the pursuit of lifelong learning, and encouraging others to achieve new goals.

Thank you, for your consideration.

Robin
